

Quercus xwarei 'Wind Candle'

Высота	10-12 m
Ширина	2-3m
Крона	column-shaped, dark, dense crown
Кора и ветви	grey
Лист	green
Осенний окрас	желтый
Цветы	yellowgreen, flowers in May
Плоды	brown
Колючки/шипы	None
Ядовитость	неядовитый, обычно
Вид почвы	loamy soil, sandy soil, calcareous soil
Мощение	неустойчив к мощению
Зона зимостойкости	6 (-23,3 до -17,8 °C)
Устойчивость к ветру	good
Прочие виды устойчивости	устойчив к морозам, зона 1 - 6, сустойчив к ветру, устойчив к соли для улиц
Применение	аллеи и широкие улицы, узкие улицы, промышленные зоны, небольшие сады
Форма	штамбовое дерево, разветвленное дерево

'Wind Candle' is a moderately strong-growing columnar tree growing 10-12 m tall. Later in life, the crown becomes narrowly oval. The upright branches grow steeply, creating a dense crown. The leaves are inversely ovate and regularly lobed. They are distinctly larger than in *Q. robur* 'Fastigiata', one of the parents of 'Wind Candle'. In summer, the leaves are glossy dark green. In autumn, the leaves turn yellow to yellow-brown. The withered leaves remain in the tree well into winter before falling off, usually into spring. 'Wind Candle' is a strong tree that grows best on nutrient-rich, moist soil. The tree has high resistance to mildew and is very wind resistant.

'Wind Candle' was selected as a seedling by Guy Sternberg, an authority on oaks from Petersburg, Illinois, USA. The tree resulted from a cross between *Quercus bicolor* and *Q. robur* 'Fastigiata'. Hardiness zone 6.
