

Robinia ambigua 'Decaisneana'

Высота	18-20 m
Ширина	10-15m
Крона	oval, half-open crown
Кора и ветви	brown, grey
Лист	green, feathered leaf
Осенний окрас	желтый
Цветы	cream white, flowers in June, fragrant flowers
Плоды	reddisch brown
Колючки/шипы	None
Ядовитость	неядовитый, обычно
Вид почвы	clayed soil, loamy soil, sandy soil, nutrient-poor soil, calcareous soil
Влажность почвы	устойчив к сухим почвам
Мощение	устойчив к мощению
Зона зимостойкости	3 (-40,0 до -24,5 °C)
Устойчивость к ветру	fairly to good
Прочие виды устойчивости	устойчив к морозам, зона 1 - 6
Дерево-среда обитания для животных	устойчив к морозам, зона 1 - 6, медонос
Применение	парки, кладбища, побережье, промышленные зоны, большие сады
Форма	штамбовое дерево, многоствольное дерево

An old, vigorously growing cultivar with a loose crown. At first it is narrow and oval, later becoming somewhat broader. Height 18 - 20 (25) m. The crown has a more regular shape than that of the species and the twigs have few to no thorns. The leaves and flowers are similar to those of the species. 'Semperflorens' blooms much more profusely, however. A less profuse flowering follows every year in August and September. Consequently, it has become popular for use as a park and avenue tree. Its open crown makes the tree reasonably to highly wind-resistant. Winter hardiness zone: 5a
