

Robinia pseudoacacia 'Tortuosa'

Высота	10-15 m
Ширина	6-10m
Крона	oval, half-open crown, capricious growing
Кора и ветви	brown, grey
Лист	green, feathered leaf
Цветы	cream white
Плоды	brown, seldom
Колючки/шипы	Yes
Ядовитость	ядовитые части
Вид почвы	clayed soil, loamy soil, sandy soil, nutrient-poor soil, calcareous soil
Влажность почвы	устойчив к сухим почвам
Мощение	неустойчив к мощению
Зона зимостойкости	5a (-28,8 до -26,1 °C)
Устойчивость к ветру	moderate
Прочие виды устойчивости	устойчив к морозам, зона 1 - 6, устойчив к соли для улиц
Применение	кашпо для деревьев, сады на крыше, промышленные зоны
Форма	штамбовое дерево, разветвленное дерево, многоствольное дерево

A moderately growing cultivar that is striking because of its twisted branches. Produces a tree 10 - 15 m high with a broad, ovoid to oval crown. Grafted on a high stem, but sometimes also on a low stem to produce a somewhat shrub-like manner of growth. A multi-trunked tree then develops later. The thorny branches grow in remarkable curves: young shoots often grow like cork-screws. The more or less hanging leaves are also somewhat twisted. Flowers appear only occasionally, only on old trees. Sensitive to strong winds. It is a valuable park tree that is used particularly for its winter silhouette. Winter hardiness zone: 5a With its tortuous and spirally twisted branches Robinia pseudoacacia 'Tortuosa' provides an exceptionally characteristic winter silhouette at a later age.
