

Salix babylonica 'Tortuosa'

Высота	6 - 10 (14) m
Ширина	6-10m
Крона	oval to rounded, half-open crown, capricious growing
Кора и ветви	yellowish grey, grooved, twigs yellowish green, very twisted
Лист	lanceolate, bright green, curved, 7 - 12 cm
Цветы	approx. 2.5 cm long flower catkins, pale yellow, March/April
Плоды	catkins
Колючки/шипы	None
Ядовитость	неядовитый, обычно
Вид почвы	moist and wet, preferably calcareous
Влажность почвы	устойчив к влажным почвам, устойчив к коротким наводнениям, устойчив к длительным наводнениям
Мощение	неустойчив к мощению
Зона зимостойкости	5b (-26,0 до -23,4 °C)
Устойчивость к ветру	good
Прочие виды устойчивости	устойчив к морозам, зона 1 - 6, сустойчив к ветру
Дерево-среда обитания для животных	устойчив к морозам, зона 1 - 6, сустойчив к ветру, медонос
Форма	штамбовое дерево, разветвленное дерево, многоствольное дерево
Происхождение	France, 1924
Синонимы	Salix matsudana 'Tortuosa'

Remarkable tree with very twisted branches, twigs and leaves. Sometimes also cultivated as a shrub. Young trees have an oval crown but as the tree ages, a more round shape develops. When mature, the yellowish grey trunk is deeply grooved. The young twigs twist like a cork screw and are yellowish green. The lanceolate leaves are bright green on top and greyish green underneath. The leaves are 7 - 14 cm long and 1.2 cm wide with a finely serrated edge. The leaves are also very curly, rendering the grey underside very visible. The flowers appear before the leaves emerge. 'Tortuosa' is a decorative tree especially in the winter, with its twisted, yellow branches. The branches are displayed in vases particularly during Easter.
