

Salix cinerea

Высота	3 - 6 (8) m
Ширина	3-6m
Крона	round, dark, dense crown
Кора и ветви	twigs grey-green, bark grey-brown, later shallow grooved
Лист	elliptical to reverse lanceolate, matt green, 5 - 10 cm
Цветы	♂ catkins greenish-yellow, 5 cm, ♀ catkins light brown, April
Плоды	catkins, approx. 8 cm long
Колючки/шипы	None
Ядовитость	неядовитый, обычно
Вид почвы	few requirements, tolerates wet to marshy soil
Влажность почвы	устойчив к влажным почвам, устойчив к коротким наводнениям, устойчив к длительным наводнениям
Мощение	неустойчив к мощению
Зона зимостойкости	3 (-40,0 до -24,5 °C)
Устойчивость к ветру	good
Прочие виды устойчивости	устойчив к морозам, зона 1 - 6, сустойчив к ветру
Дерево-среда обитания для животных	устойчив к морозам, зона 1 - 6, сустойчив к ветру, притягивает бабочек
Применение	кашпо для деревьев, сады на крыше
Происхождение	Europe, Eastern to Central Asia

Sturdy shrub to small tree with a spherical crown, does not usually grow taller than about 5 m. The young twigs are grey-green with grey, felt-like hair in the first two years. Older bark is grey-brown and smooth, developing shallow longitudinal grooves with age. The leaves are elliptical to reverse lanceolate. The upper side is matt green with very short hair. The underside has dense grey felt-like hair. The half heart-shaped stipules remain on the leaf base all season. The catkins ripen in April. Male catkins are approx. 5 cm long and greenish-yellow. Female catkins are light brown and approx. 8 cm long in the fruit stage. Grows on almost any soil, including very infertile. Cannot tolerate drought but can take wet to marshy soil. This makes the tree suitable for river banks.
