

Syringa vulgaris 'Monique Lemoine'

Высота	3-4 m
Ширина	2-3m
Крона	broad oval, half-open crown
Кора и ветви	flaking, brown, grey
Лист	green
Цветы	white, flowers in May, fragrant flowers
Плоды	brown
Колючки/шипы	None
Ядовитость	неядовитый, обычно
Вид почвы	clayed soil, loamy soil, sandy soil, peaty soil, all soil types
Мощение	неустойчив к мощению
Зона зимостойкости	4 (-34,4 до -28,9 °C)
Устойчивость к ветру	good
Прочие виды устойчивости	устойчив к морозам, зона 1 - 6, сустойчив к ветру
Дерево-среда обитания для животных	устойчив к морозам, зона 1 - 6, сустойчив к ветру, притягивает бабочек
Применение	кашпо для деревьев, сады на крыше, небольшие сады
Форма	многоствольное дерево

'Monique Lemoine' is a large shrub to small tree with a broad oval crown of 3-4 m reached. The young twigs are green and the old bark is grey-brown, flaking off slightly in small patches later in life. The broadly ovoid leaves are 9-12 cm long and are light green to mid-green in colour. The flower panicles are large and quite broad. They are about 15-22 cm long and 9-12 cm wide. The individual flowers are remarkably large, reaching 2.5-3 cm in diameter. The flower buds are pale greenish-yellow. The opened flowers are pure white and fully filled with narrow corolla lobes, giving the blooms a finer texture. They have a strong and pleasant fragrance. The flowers open in the first half of May. 'Monique Lemoine' flowers very richly, with up to four flower panicles per branch. This enhances the impression of a full, richly flowering plant.

Syringa vulgaris grows in any nutrient-rich and humus-rich soil. The plant prefers neutral to calcareous soil. 'Monique Lemoine' is very similar to 'Mme Lemoine', but differs from it in that the tree grows more vigorous and the flowers are slightly less double. Like the other cultivars of S. vulgaris, 'Monique Lemoine' is very suitable for use in parks and gardens. 'Monique Lemoine' was introduced by Victor Lemoine & Fils in Nancy, France, in 1839. Hardiness zone 4.
