

Tamarix ramosissima 'Pink Cascade'

Высота	3 - 4 m
Ширина	2-3m
Крона	fan-shaped , light, open crown
Кора и ветви	dark brown bark, slightly grooved, twigs green turning purplish red later
Лист	lanceolate to oval, light bluish green, 0.1 - 0.5 cm
Цветы	clusters joined in plumes approx. 30 cm long, pink, July/September
Плоды	unremarkable fruit capsules
Колючки/шипы	None
Ядовитость	неядовитый, обычно
Вид почвы	sandy soil, tolerates dry conditions
Влажность почвы	устойчив к сухим почвам, устойчив к коротким наводнениям
Мощение	неустойчив к мощению
Зона зимостойкости	4 (-34,4 до -28,9 °C)
Устойчивость к ветру	good
Прочие виды устойчивости	устойчив к морозам, зона 1 - 6, сустойчив к ветру
Дерево-среда обитания для животных	устойчив к морозам, зона 1 - 6, сустойчив к ветру, медонос
Применение	кашпо для деревьев, сады на крыше, промышленные зоны, небольшие сады, сады в патио
Форма	штамбовое дерево
Происхождение	unknown

Large bush that grows into a small tree with pendulous twigs. The dark brown bark is slightly grooved at a later age. The twigs are a shiny light green, turning yellowish in the winter. The scaly, narrow, oval leaves are light bluish green. Leaves on young twigs are 0.4 to 0.5 cm long, on older branches approx. 0.1 cm long. Small pink flowers grow in clusters of 4 - 7 cm long that are arranged in large plumes of approx. 30 cm. The petals fall off quickly, but the stamens remain a long time. After flowering, small capsule fruits containing plentiful seeds appear. 'Pink Cascade' is the most winter-hardy Tamarix that is excellent suited for coastal areas as it tolerates salty air. When the plant is not blooming, it bears a superficial similarity to some conifers.
