

## Tilia americana

<b>Высота</b>	25 - 30 m, fast growing
<b>Ширина</b>	10-15m
<b>Крона</b>	broad ovoid to rounded, half-open crown
<b>Кора и ветви</b>	grey, slightly grooved, young twigs olive green
<b>Лист</b>	broad ovoid, base of the leaf slanted heart shape, dark green, 10 - 20 cm
<b>Цветы</b>	pendulous umbels of 6 - 15 flowers, pale yellow, late July, fragrant flowers
<b>Плоды</b>	round to elliptical, greyish, short felt-like hair, Ø approx. 0.9 cm
<b>Колючки/шипы</b>	None
<b>Ядовитость</b>	неядовитый, обычно
<b>Вид почвы</b>	places little demands, not on soil that is too dry
<b>Мощение</b>	неустойчив к мощению
<b>Зона зимостойкости</b>	5b (-26,0 до -23,4 °C)
<b>Устойчивость к ветру</b>	good
<b>Прочие виды устойчивости</b>	устойчив к морозам, зона 1 - 6, сустойчив к ветру
<b>Дерево-среда обитания для животных</b>	устойчив к морозам, зона 1 - 6, сустойчив к ветру, притягивает бабочек
<b>Применение</b>	аллеи и широкие улицы, промышленные зоны
<b>Форма</b>	штамбовое дерево
<b>Происхождение</b>	eastern and central United States

Fairly fast grower with a loose crown that eventually reaches a maximum height of approx. 30 m. Young trees have smooth, grey bark, but older trees have regular, shallow grooves. Young twigs are smooth and olive green, often reddish brown on the top and side facing the sun. The leaves are remarkably large and taper to an abrupt point at the top. The base of the leaf is a slanted heart shape and the edge is sharp and roughly serrated. The upper side of the leaf is dark green while the underside is light green. Starting in July, umbels of aromatic, pale yellow flowers appear. The individual flowers are approx. 1.2 cm in diameter, the bract is pale yellow and approx. 11 cm long. T. americana has many deep lateral roots and is rarely used as an avenue or street tree because of its broad crown.
