

## Toona sinensis 'Flamingo'

Высота	10 - 15 m
Ширина	7-10m
Крона	oval to broad oval, half-open crown
Кора и ветви	twigs copper-coloured and hairy, bark brown-grey with longitudinal splits
Лист	paripinnate, 40 - 60 cm, glossy light green, young leaf pink, feathered leaf
Осенний окрас	желтый
Цветы	white, in pendent panicles to 50 cm long, June/July
Плоды	woody capsule with 5 splits containing winged seeds, Ø 2 - 3 cm
Колючки/шипы	None
Ядовитость	неядовитый, обычно
Вид почвы	good, nutrient-rich soil
Мощение	неустойчив к мощению
Зона зимостойкости	6b (-20,5 до -17,8 °C)
Устойчивость к ветру	fairly
Прочие виды устойчивости	устойчив к морозам, зона 1 - 6
Форма	штамбовое дерево, многоствольное дерево
Происхождение	Australia, pre-1930

Particularly striking medium-size tree growing to 10 to 15 m. Initially the tree grows slenderly upwards and has a columnar crown. At a later stage the crown spreads. The young twigs are copper-coloured and hairy. The mature bark is grey-brown with longitudinal splits later. When damaged, the bark, branches and leaves smell unpleasant. The large, paripinnate leaf consists of 20 - 26 leaf segments. These are the same shape as the species. On emerging, they are intense orange-pink, turning greenish-yellow and eventually glossy, light green. In autumn the leaf turns yellow. The small, equally unpleasant smelling flowers appear in large panicles. After the blossom, woody capsules form containing winged seeds. The flowers and fruits only appear in hot summers. A special park tree or solitary.
