

Zanthoxylum schinifolium

Высота	3 - 4 m
Ширина	3-4m
Крона	round, half-open crown, capricious growing
Кора и ветви	twigs brown, with one flat thorn under each bud, bark grey
Лист	imparipinnate with 11 - 21 leaf segments, elongated-oval, dark green, 2 - 3 cm, feathered leaf
Осенний окрас	желтый
Цветы	in axillar clusters, green to brown-green, July/August
Плоды	fleshy, round capsules, green to brownish red, aromatic
Колючки/шипы	Yes
Ядовитость	неядовитый, обычно
Вид почвы	few requirements
Мощение	неустойчив к мощению
Зона зимостойкости	6 (-23,3 до -17,8 °C)
Устойчивость к ветру	fairly to good
Прочие виды устойчивости	устойчив к морозам, зона 1 - 6, сустойчив к ветру
Дерево-среда обитания для животных	устойчив к морозам, зона 1 - 6, сустойчив к ветру, притягивает бабочек
Применение	кашпо для деревьев, сады на крыше
Форма	штамбовое дерево, многоствольное дерево
Происхождение	Eastern China, Korea, Japan

Grows from a shrub shape to small, sometimes multi-stemmed tree with a round crown. On the twigs there is a flat thorn under each bud. On mature bark, these thorns are sometimes visible as small bumps. The graceful, imparipinnate leaves consist of 11 to 21 dark green, elongated-oval leaf segments. The leaf margins have fine rounded teeth and dissected tips. The leaf stem is bare and has fine prickles on the underside. In autumn the leaf turns yellow. The compact clusters of green to brown-green flowers open in July and August. They are followed by small green to brown-red, spherical, fleshy capsules that contain black seeds. As with *Z. piperitum*, in Japan the seeds are ground and used as pepper. A park tree that has few soil requirements.
